

Report for Scenario: Dry Season Survival

[OPERATIONAL] Scenario Dry Season Survival: VULNERABLE

Legend for Scenario Elements

Node Types

Edge Types

Instances per Class

Total Instances: 15

Vulnerabilities

Total Instances: 3

Capabilities

Total Instances: 7

● Enabled (7) ● Disabled (0)

Entities

Total Instances: 4

- Assets (2)
- Threats (2)
- Controls (3)
- Unclassified (0)

Scenario's Indexes

Resilience Index: 66.67%

Proportion of vulnerabilities that did not result in damage or were prevented.

Vulnerability Index: 33.33%

Proportion of vulnerabilities that are considered active or damaging.

Capabilities-to-Vulnerabilities Ratio: 2.33

Number of capabilities divided by the number of vulnerabilities across all assets.

Capabilities-to-Vulnerabilities Ratio (Enabled & Exploited): 7

Number of capabilities divided by the number of enabled and exploited vulnerabilities across all assets.

Capabilities-to-Vulnerabilities Ratio (Enabled & Not Exploited): 0

Number of capabilities divided by the number of enabled but not exploited vulnerabilities across all assets.

Capabilities-to-Vulnerabilities Ratio (Disabled & Exploited): 3.50

Number of capabilities divided by the number of disabled and exploited vulnerabilities across all assets.

Capabilities-to-Vulnerabilities Ratio (Disabled & Not Exploited): 0

Number of capabilities divided by the number of disabled and not exploited vulnerabilities across all assets.

Exposed Capabilities Count: 2

Total number of capabilities exposed by any vulnerability.

Exposed Capabilities Count (Enabled & Exploited): 1

Number of capabilities exposed by enabled and exploited vulnerabilities.

Exposed Capabilities Count (Enabled & Not Exploited): 0

Number of capabilities exposed by enabled but not exploited vulnerabilities.

Exposed Capabilities Count (Disabled & Exploited): 1

Number of capabilities exposed by disabled and exploited vulnerabilities.

Exposed Capabilities Count (Disabled & Not Exploited): 0

Number of capabilities exposed by disabled and not exploited vulnerabilities.

Per-Asset Capability Risk: 1

Average number of exposed capabilities per asset.

Per-Asset Capability Risk (Enabled & Exploited): 0.50

Average number of capabilities per asset exposed by enabled and exploited vulnerabilities.

Per-Asset Capability Risk (Enabled & Not Exploited): 0

Average number of capabilities per asset exposed by enabled but not exploited vulnerabilities.

Per-Asset Capability Risk (Disabled & Exploited): 0.50

Average number of capabilities per asset exposed by disabled and exploited vulnerabilities.

Per-Asset Capability Risk (Disabled & Not Exploited): 0

Average number of capabilities per asset exposed by disabled and not exploited vulnerabilities.

Control-to-Asset Ratio: 1.50

Number of controls divided by the number of assets in the scenario.

Threat-to-Asset Ratio: 1

Number of threats divided by the number of assets in the scenario.

Control-to-Threat Ratio: 1.50

Number of controls divided by the number of threats in the scenario.

Preserves per Resilience Ratio: 1

Average number of 'preserves' relations per resilience instance.

PreservesDespite per Resilience Ratio: 1

Average number of 'preservesDespite' relations per resilience instance, indicating tolerance mechanisms.

PreservesAgainst per Resilience Ratio: 1

Average number of 'preservesAgainst' relations per resilience instance, indicating protective mechanisms.

Sustains per Resilience Ratio: 1

Average number of 'sustains' relations per resilience instance.
